

PROGRAMME OF THE SUBJECT TOUR TO LABORATORIES OF ALEKSANDRAS STULGINSKIS UNIVERSITY on 27th of June (15:30 – 16:40)

Five integrated science, research and business centres (valleys) have been developed recently in Lithuania. Valleys specialize in a number of scientific research fields and involve main Lithuanian research institutions. According to the national rules, all R&D resources located in the valleys must be available for the public on the basis of open access. For this reason, universities and research institutes must establish open access centres and provide access to their R&D resources. Other entities which possess R&D equipment are also eligible to establish an open access centre. So far, more than 20 open access centres have been created in Lithuania.

You are welcome to the following Laboratories of ASU:

- ✓ LABORATORY OF AGROBIOLOGY (prof. dr. V. Bogužas, assoc. prof. dr. J. Aleinikovienė)
- ✓ GREENHOUSE (A. Bočys)
- ✓ BIODIESEL, BIOETHANOL AND BIOLOGICAL LUBRICANTS LABORATORY (dr. K. Kazancev)
- ✓ SYNTHESIS GAS, SECOND GENERATION LIQUID BIOFUEL AND BIOHYDROGEN LABORATORY (prof. dr. E. Sendžikienė)
- ✓ LABORATORY OF BIOLOGICAL WASTE AND BY-PRODUCTS USAGE (dr. Milda Gumbytė)
- ✓ LABORATORY OF BIOGAS (prof. dr. K. Navickas)
- ✓ LABORATORY OF QUALITY VEGETABLE RAW MATERIALS (assoc. prof. dr. A. Paulauskienė)

Open Access Centre Coordinator

Dr. Vaida Steponavičienė
